

BIOMEMBRANE MCP

Key points for initial outreach - The Toro Space

The Problem:

- Fruit spoilage leads to significant economic losses for growers, distributors, and retailers.
- Consumers experience frustration and financial burden due to wasted produce.
- Current preservation methods are often inadequate or environmentally unfriendly.

Our Solution:

Our innovative technology extends fruit shelf life by up to 50%, preserving freshness, taste, and nutritional value. This translates to:

- Reduced waste
- Increased profitability
- Happier customers

Before & After

See the visible difference our technology makes:

Before (7 Days)

After (7 Days + Our Tech)

Key Benefits

- *Reduces waste by up to 40%.
- *Increases shelf life significantly.
- *Maintains fruit quality.
- *Improves profitability for the entire supply chain.
- *Sustainable and eco-friendly approach.
- *Easy integration into existing processes.
- *Enhanced customer satisfaction.
